PT. AISYAH CAHAYA NUSANTARA

HERBS AND SPICES

DRY - POWDER - OIL

LONG PEPPER

Long pepper, sometimes called long pepper or pipli, is a flowering vine in the family Piperaceae, cultivated for its fruit, which is usually dried and used as a spice and seasoning

CLOVE

Cloves are the aromatic flower buds of a tree in the family Myrtaceae, Syzygium aromaticum

CINNAMON

Cinnamon is a spice obtained from the inner bark of several species of trees of the genus Cinnamomum. Cinnamon is used primarily as an aromatic spice and flavoring additive in a wide variety of cuisines, sweet and savory dishes, breakfast cereals, snacks, teas, and traditional foods.

CARDAMOM

Cardamom is a type of spice produced from the seeds of several plants of the genera Elettaria and Amomum in the Zingiberaceae family.

Long pepper (*Piper longum*), long pepper or pippali, is a flowering vine in the family *Piperaceae*, cultivated for its fruit, which is usually dried and used as a spice and seasoning. Long pepper has a taste similar to, but sweeter and less pungent than, that of its close relative *Piper nigrum* – from which black, green and white pepper are obtained.

The fruit of the pepper consists of many minuscule fruits – each about the size of a poppy seed – embedded in the surface of a flower spike that closely resembles a hazel tree catkin. Like *Piper nigrum*, the fruits contain the pungent compound piperine, which contributes to their pungency. Another species of long pepper, *Piper retrofractum*, is native to Java, Indonesia. The fruits of this plant are often confused with chili peppers, which belong to the genus *Capsicum*, originally from the America

MORINGA LEMONGRASS

Ingredient :

Moringa Powder 100 %

Lemongrass Leaf Powder 100 %

COFFEE EAST JAVAMERU

mellari's coffee

How to make drip coffee

TEAR
Remove the drip bag from the water packet and carefully tear along the dashed line

EXTEND
Gently extend the arms of the drip bag and place over the cup so it fits on the top

POUR
Pour 20ml of hot water into the drip bag and wait for 30 seconds before slowly pouring a further 150ml of hot water over the granules

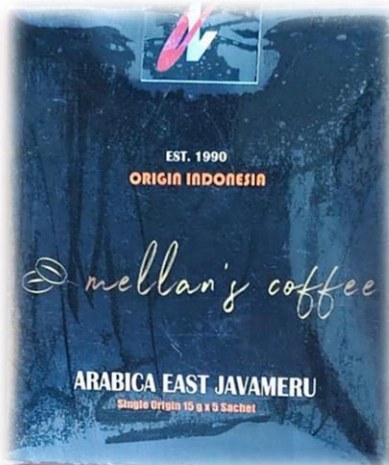

ENJOY
Wait for 3 minutes before consuming the drip bag and elute with additional water as required

INGREDIENT
Natural Coffee Fine Grade
Low Fat
Sugar Free
Low Calorie

COCONUT DERRIVATIF PRODUCTS

COCONUT CHARCOAL BRIQUETTE is a compact block charcoal which made from coconut shell charcoal. Our charcoal briquette is made of granular coconut shell charcoal that is crushed charcoal and moulded using a natural binder. As fuel, it is hotter and last longer than ordinary charcoal. It is suitable for household use both indoor and outdoor. Also, it can be used in food industries, for barbecue, stove fuel, metallurgy, etc.

COCONUT OIL, or copra oil, is an edible oil extracted from the kernel or meat of mature coconuts harvested from the coconut palm (*Cocos nucifera*). It has various applications. Because of its high saturated fat content, it is slow to oxidize and, thus, resistant to rancidification, lasting up to six months at 24 °C (75 °F) without spoiling.

COCONUT FIBER, is a natural fiber extracted from the husk of coconut and used in products such as floor mats, doormats, brushes and mattresses. Coir is the fibrous material found between the hard, internal shell and the outer coat of a coconut. Other uses of brown coir (made from ripe coconut) are in upholstery padding, sacking and horticulture. White coir, harvested from unripe coconuts, is used for making finer brushes, string, rope and fishing net

COCOPEAT BLOCKS are considered an ideal growing medium. The cocopeat powder thus obtained is sieved, washed, dried and finally compressed into blocks. The blocks can be used for a wide range of planting requirements. Coir is known for its natural rooting hormones and anti-fungal properties. We also ensure secure packaging of the cocopeat blokcs

DESICCATED COCONUT is a grated, dried (3% moisture content max.), and unsweetened fresh meat or kernel of a mature fruit of coconut. Desiccated Coconuts are graded by its cutting size, for example, fine grade and medium grade where fine grade is smaller particle size than the medium grade.

VIRGIN COCONUT OIL is the oil extracted from coconuts without the application of heat. It is rapidly gaining popularity throughout the world in comparison to ordinary coconut oil and for a good reason. There is, in fact, a substance called virgin coconut oil and it differs from regular coconut oil in significant ways. These differences mainly lie with the source (more specifically, the physical form of the source), the method of extraction, and its subsequent benefits.
